Innovation Project

What is it?

- Hoot
- A free, decentralized, federated micro-blogging website
- Based on the ActivityPub protocol

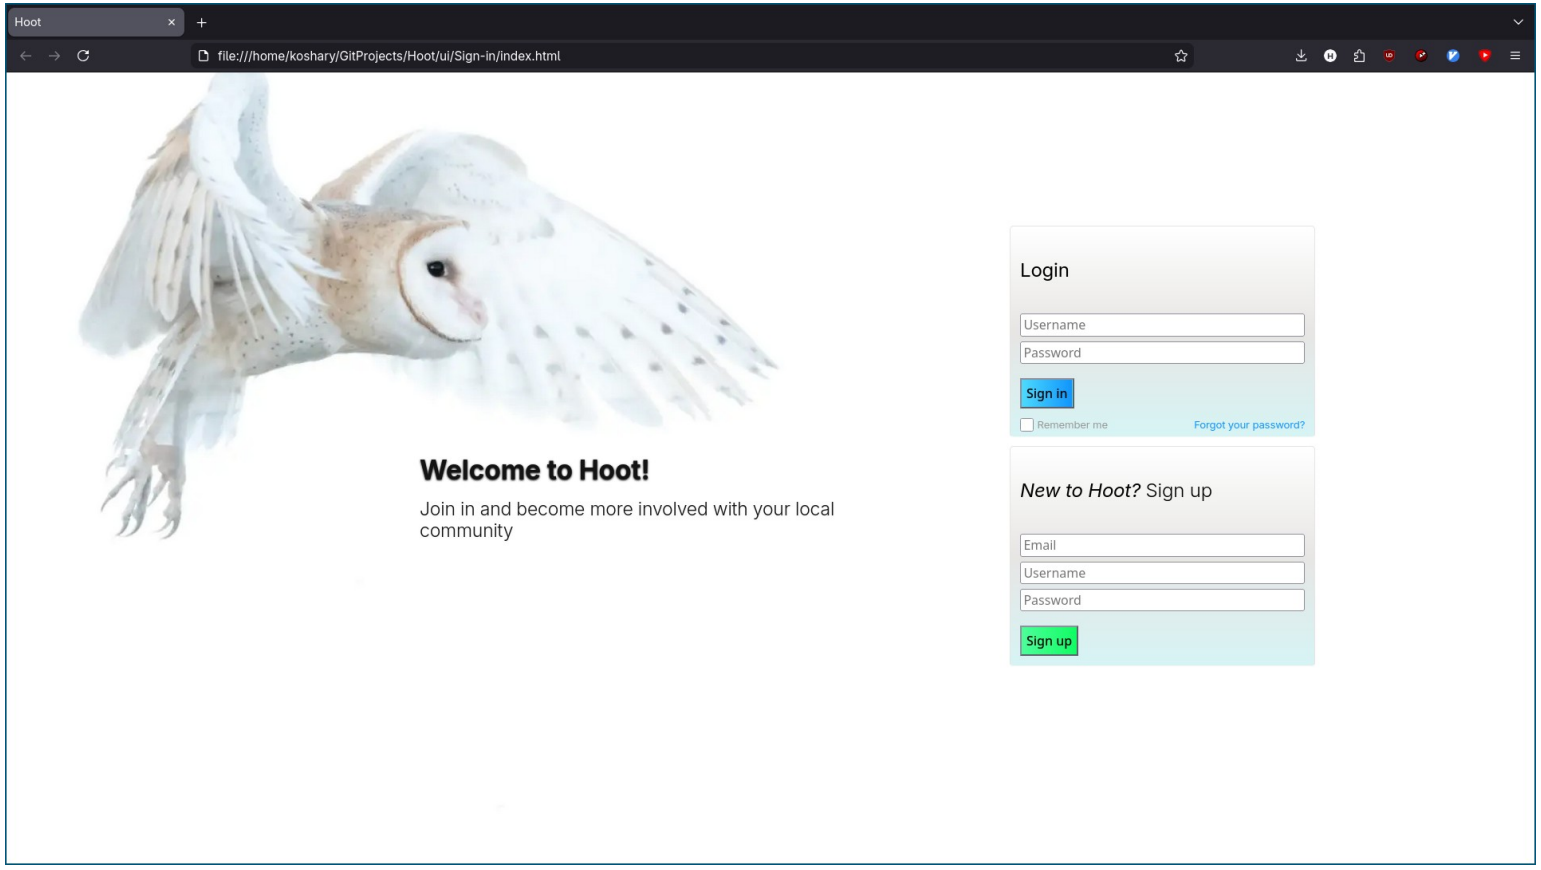

What does any of that even mean?

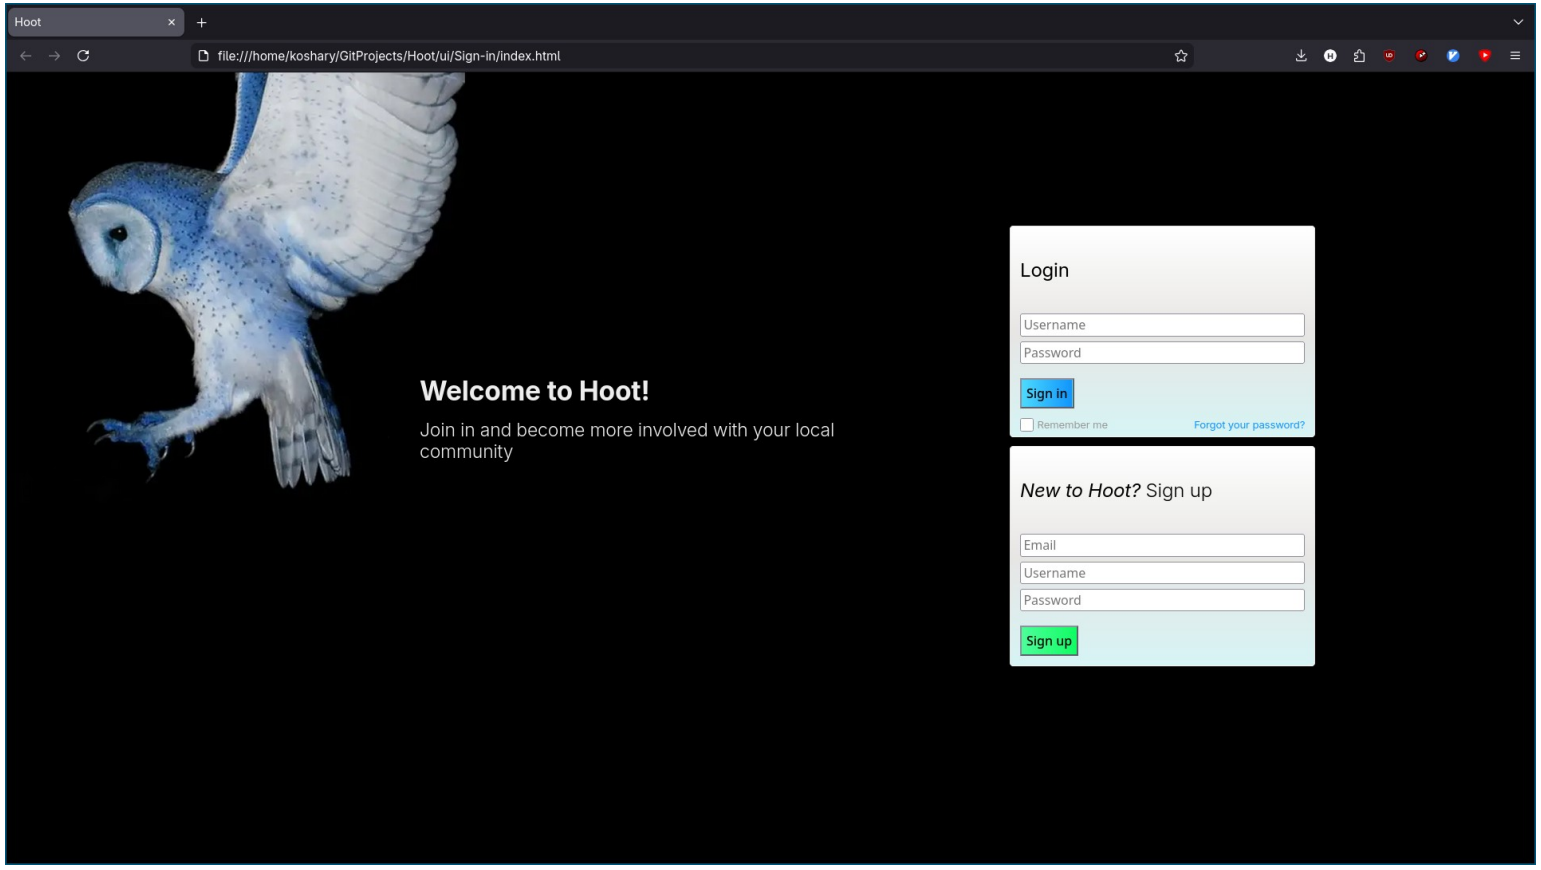

Fediverse

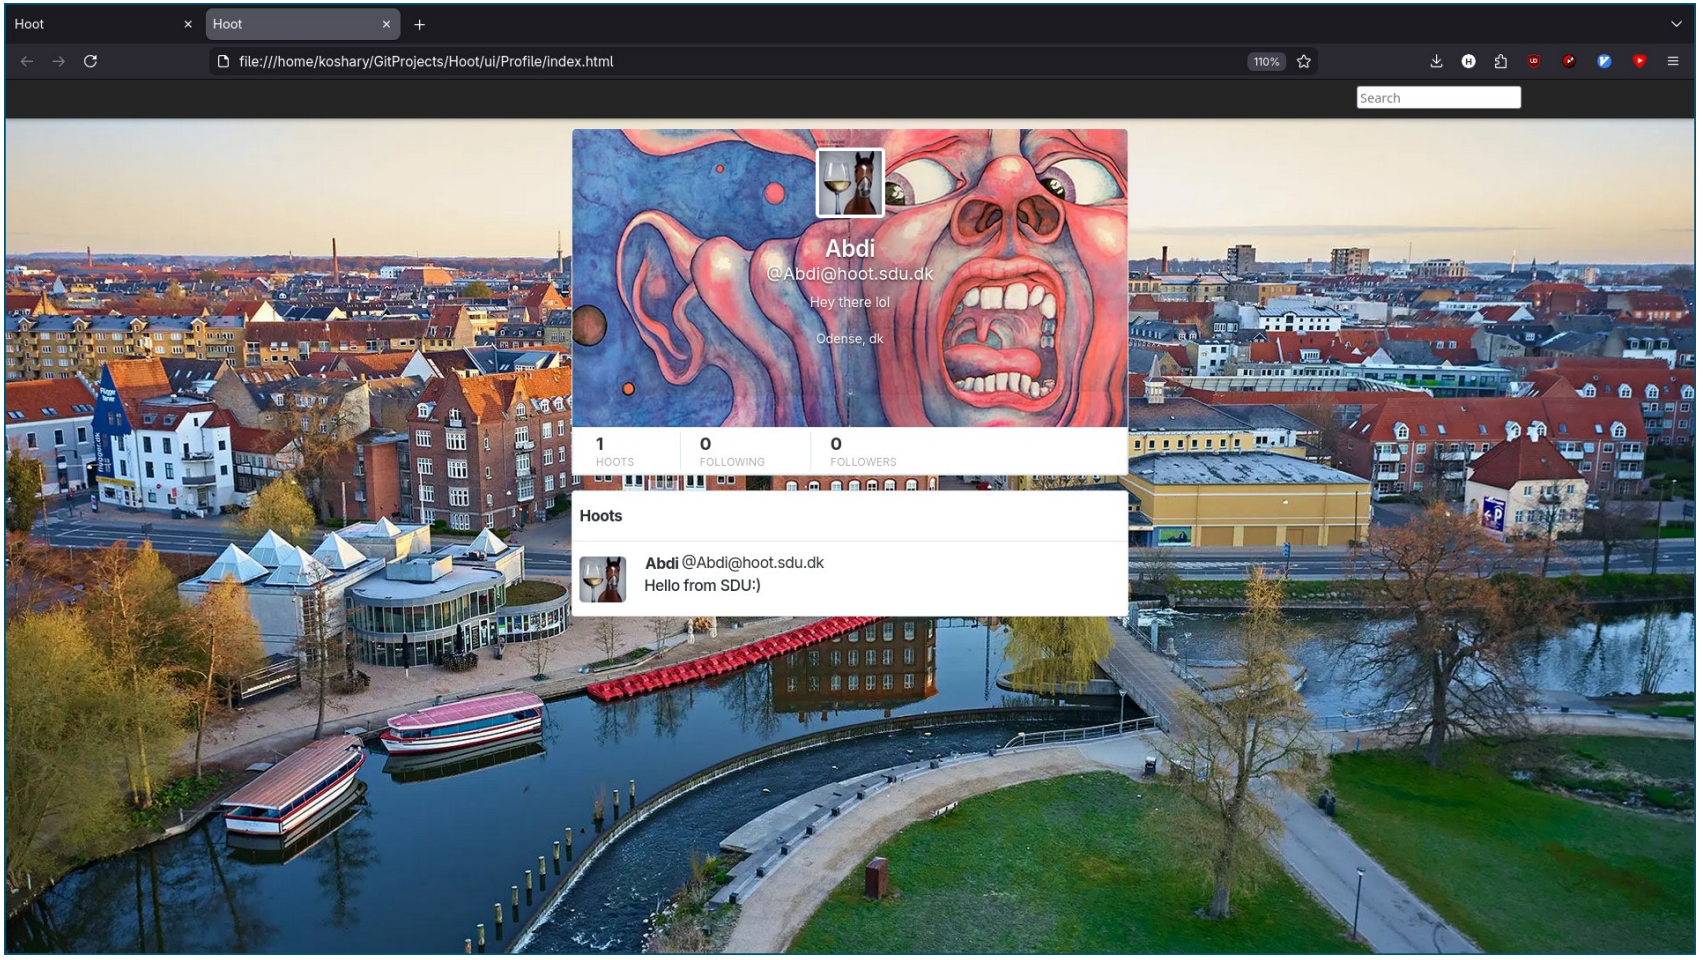

ActivityPub

But the catch is

- Its location based
- Instance owner decides it
- Any other instances that fall inside the area can be federated with it

Hello from SDU:)

Customer segment

- Who are we building this for?
- Local communities
- Privacy oriented individuals
- Organization and local institutions

Value proposition

- What problem does it solve
- Local connection
- Less outer influence on serious topics
- No algorithms means no engagement baits

Channels

- How to discover Hoot?
- Website
- Partnerships
- Word of mouth

Customer relationship

- How do we interact with customers?
- Documentation
- Feedback
- Direct support

Key resources

- What does Hoot need to operate
- Our engine and evaluator
- Openstreetmap
- ActivityPub

Revenue stream

- How do we make money
- Institutions Subscriptions for verified instances
- EU commission funds
- Donations

Key Activities

- What must Hoot do well?
- Better location handle
- Ensure freedom to user
- More fleshed out UI

Key partnerships

- Who can help us succeed?
- Early adopters
- OpenStreetMap
- Fediverse communities

Cost structure

- Database storage
- Infrastructure
- Security

Quick demo & Feedback
